Vertical Turbine

Vertical lineshaft pumps with submerged pump bowl, lineshaft and drive unit on the surface for installation in deep wells or tanks. Featuring an extremely solid and reliable construction design, they ensure great flexibility in application. The technical characteristics and broad range of versions make this series ideal for pumping services in the sectors of water supply, industry, private and consortium irrigation and in fire-fighting systems. These machines can be controlled both by electric motors or diesel engines and they ensure unequalled service efficiency.
